

DetectedX

World Class Radiology Training for Screening Centres

Built by global leaders in medical imaging and radiology education, DetectedX is an online learning center delivering proven results for users around the world.

We understand that quality assurance is crucial to the success of any screening practice and have tailored our training packages to your needs.

All CME requirements on a single on-demand platform

- Clinic level visibility on usage and performance
- Instant CME certification
- On-demand cloud-based access 24/7
- Interactive self-assessment modules, quizzes and lectures

Visit detectedx.com/packages or visit our booth, 7951 in North Hall to learn more.

Your CME accredited training package includes medical imaging training fundamentals:

CME accredited medical imaging training

- 4 x 30 case 2D self-assessment modules
- 4 short, case-based quizzes

Reporting and onboarding

- Dashboard & accreditation reports (if required)
- Quarterly usage reports
- Complete on-boarding training

You can also add extra training modules to your package:

- 2 x 30 easy 2D self-assessment modules
- 4 X 15 case DBT self-assessment modules
- 2 X 10 case breast quality self-assessment modules
- Learning content by world leading breast imaging educator Professor László Tabár
- Suite of lectures that cover breast imaging principles including interpretation, quality, AI and underlying scientific principles

DetectedX can work with you to customize a training package to suit your screening center.

DetectedX learning is fully accredited and CME / CPD certifications can be accessed by learners upon successful completion of modules.
